

## User Prompt

What percentage of total energy used by Future Consumer and Siemens comes from renewable sources?

## Agents Conversation History

**Sub-question 1:** subquestion = What is the percentage of total energy used by Siemens that comes from renewable sources, as per their latest sustainability report or BRSR filing?

**worker\_agent:** answer =It seems the relevant information provided is empty (""). Without specific data from Siemens' latest sustainability report or BRSR filing, I cannot provide the exact percentage of their total energy use that comes from renewable sources.

If you can share relevant information or data chunks, I will analyze them and provide the answer accordingly. Alternatively, you can check Siemens' latest sustainability report or BRSR filing directly for specific numerical details on their energy mix and renewable energy usage.

**Sub-question 2:** subquestion = What is the percentage of total energy used by Future Consumer that comes from renewable sources, as per their latest sustainability report or BRSR filing?

**worker\_agent:** answer =It seems that the relevant information required to answer your question is not provided in the chunks. Without specific data from Future Consumer's latest sustainability report, BRSR filing, or any other relevant source, I cannot determine the percentage of total energy used by Future Consumer that comes from renewable sources.

If you have access to the sustainability report or BRSR filing, you can look for sections specifically detailing energy consumption and renewable energy usage. These sections often provide the breakdown of total energy consumption and the proportion derived from renewable sources. Alternatively, please provide additional data or relevant chunks, and I will assist you further!

## All Context Chunks

## Director Response

Based on the information provided, there is no available data regarding the percentage of total energy used by Future Consumer or Siemens that comes from renewable sources. Neither company's sustainability report nor BRSR filing was shared or analyzed, leaving the question unanswered.

### Summary of Findings:

- **Future Consumer:** No data available on the percentage of energy derived from renewable sources.
- **Siemens:** No data available on the percentage of energy derived from renewable sources.

### Suggestions:

To obtain this information, you can refer directly to the latest sustainability reports or BRSR filings

of Future Consumer and Siemens. These documents typically include sections on energy usage and the proportion of energy from renewable sources.

**Conclusion:**

The information required to answer your question is missing. If you have access to relevant documents or data, I can help analyze them further.
